Fort McMurray Burning!

It is May 20th, and Canada Pump and Power (CPP) crews are still on the ground in Fort McMurray filling fire trucks with water from the river, providing temporary power for command centers and communication towers, backing up the municipal water supply, and assisting the emergency services crew with fittings and parts that are in short supply.

Despite the shutdown of most of the oil sands operations and evacuation of personnel, CPP crews never left entirely. We are maintaining pump and fire watch crews working North of the City, ensuring that critical ponds do not overflow and information is flowing back to our Clients.

All of us at CPP would like to thank our Fort McMurray personnel who continue to work remotely, away from their family members who are displaced and homeless. One of our Clients contacted our CEO today to tell him that "Canada Pump and Power Personnel all act like they are the owners of the company". This is a big compliment and certainly does reflect our culture.

If there is anything we can do to help your pump and power needs, please email Sales@MightyPumps.com for a free engineering evaluation of your needs and a competitive proposal.
