## Expanding into South and Central America

Canada Pump & Power (CPP) developed and manufactures the Autonomous Mighty Dredge, Mighty Diesel Pumps, and Mighty Modular Barges. Our equipment works better, lasts longer, and costs less to operate than alternatives. Over the last seven years, we have operated our equipment in the harsh conditions of Northern Alberta, Canada.

We have proven this equipment is reliable 24/7 at 37 degrees in the summer and minus 40 degrees in the winter. Our pumps and dredges operate covered with bitumen, buried in sand, and frozen into the ice. Our teams utilize our proprietary equipment and detailed safe work processes to provide solutions to our Clients problems, going beyond the scope of an equipment provider.

We are ISO 9001:2008 Certified and ISNetworld Green Qualified.

In the last three years we have also sold equipment to Rio Tinto, Suncor, Anglo-American, and others.

Ana Habib has recently joined Canada Pump and Power to introduce Mighty equipment and our specialized services to mines and other industrial Clients in Chile, Mexico, and Brazil. Ana lives in Mexico and Brazil, and has extensive experience in marketing Canadian Products in her part of the world.

If we can help you with any of your Marine Industrial needs, call us anytime at 1-780-922-1178 or email us at [Sales@MightyPumps.com](mailto:Sales@MightyPumps.com). If you want to contact Ana, you can email her at [ahabib@mightypumps.com](mailto:ahabib@mightypumps.com).
