HDPE Fusion Training

Last month, Canada Pump & Power brought in the McElroy instructor from our sister company, Pacific Pump & Power, to teach McElroy University Course TR201 - the Medium Diameter Fusion Operator Course - to 58 drainage operators at Suncor! This training was done over four, two 12-hour day sessions on the client's site. This was a very efficient way to get their crews certified.

This certification allowed all four of their shifts to ensure they are fusing pipe consistently across all crews. With this training, they can be confident that their joints going forward are the strongest parts of the pipe!

Canada Pump & Power can do courses for you too! Let us know if you are interested in McElroy certifications for your crews.

If we can help you with any of your marine industrial needs, call us anytime at 1-780-922-1178 or email us at Sales@MightyPumps.com.
