Dragflow and Mighty Dredge Become Partners!

Canada Pump and Power (CPP) and Dragflow Representatives met at the Dragflow Dredge Pump Assembly Plant in Italy this month.

CPP and Dragflow Executives have entered into a partnership to combine the new Autonomous Mighty Dredge Technology with proven Dragflow Dredge Pumps.

Effective Immediately, CPP is building and selling four inch (100MM), eight inch (225mm), twelve inch (300mm) and sixteen inch (400 mm) output Mighty Dredges. These Dredges come with Agitators, Jetting Rings, or Cutterheads as required to dredge different materials.

Dragflow has designed and is custom building these units specifically for the Mighty Dredge line.

Our new technology is changing the way Dredging Operations are done by providing a computer operated solution to dredging with no personnel required to operate the dredge.
