Large Pump Project in Alberta

Canada Pump and Power is mobilizing a 10,000 cubic meter per hour pump project in northern Alberta. This project consists of installing seven Mighty Pump DT18 diesel driven jet-prime pumps on 10 modular barges. This project includes fusing HDPE discharge piping, fusing 24" suction manifolds, installing double block and bleed set-ups, and flex hoses.

This floating set-up allows the pumps to go up and down as the level of pond they are pumping from fluctuates.

If we can assist you with your Dive, Pump, Barge, or Dredge needs, email us any time at sales@canadapumpandpower.com or call us at 1-877-898-3494. You can check out our line of pumps and other industrial marine equipment at www.mightypumps.com.
