Product Feature

Mighty Pumps has offered our pumps with silencing enclosures designed to sound attenuate the units and protect the pump from the elements since we started building pumps in 2010. This past week we have built our largest cabinets to date! A project that is coming up this summer requires two 18" DT18 Jet-Prime pumps at reduced sound levels so the pumps can be utilized along side residences for some upcoming sewer bypass work. These pumps are very large weighting about 10 tons. The newly built enclosures, along with silencing mufflers, bring the dB rating down to about 70 dB!

The cabinets in the photo are pre-paint, and pre-decals, they will soon look like the smaller unit parked beside it.

If you are interested in purchasing Mighty Pumps Equipment, please email Sales@MightyPumps.com for a free engineering evaluation of your needs and a competitive quote.
