Working Up North

Canada Pump & Power is growing!

One of our new projects this winter is building new 525 horsepower Submersible Electric Mighty Pumps to provide a turnkey pumping solution for Rio Tinto at Lac de Gras, Northwest Territories.

We will set up this equipment in the summer, and then work in the fall and winter, transferring millions of gallons of water to make way for a new mining site.

This work is at a remote site, accessible by winter ice road or aircraft. Our crews will be dealing with the harshest winter conditions on the planet prior to the project's completion. The great reputation of our personnel has given our Client the confidence to trust Canada Pump and Power to complete the task.

If we can help you with any of your Marine Industrial needs, call us anytime at 877-898-3494 or email us at Sales@MightyPumps.com.
