

# The CPP Connection

The Monthly Newsletter of Canada Pump and Power

February 2010

**PUMP • BARGE • DREDGE**

## Our Pumps Tell You Where They Are And What They Are Doing!

- You can see where a pump from Canada Pump and Power is on a Google Map.
- You can tell what a pump from Canada Pump and Power is doing on a web link that is in real time.
- A pump from Canada Pump and Power can also tell you, via phone, text, or email, how it is doing.
- But because our pumps run longer, are tougher, and have better warranties, you will not need to check on the pump, nor will it interrupt you, as often as you might think.

The screenshot displays two browser windows from the Canada Pump & Power monitoring system. The left window, titled 'Sites & Locations', shows a dashboard with a navigation menu, a 'Monitoring' section, and several real-time data gauges. The gauges include 'Hours' (253.3), 'RPM' (1870), 'ft' (5.8), and '°F' (180). The right window, titled 'Pump002', shows a detailed view of a specific pump, including a satellite map, communication controls (Poll for Update, Launch Messaging Window), and remote control options (Start Engine, Stop Engine).

Call us at your convenience at 1-877-898-3494 or email us at [sales@albertapumps.com](mailto:sales@albertapumps.com).
