## CPP's Sister Company in Hawaii

Canada Pump and Power (CPP) has a sister company called Pacific Pump and Power (PPP) which is operated out of Oahu, Hawaii and services the Hawaiian Islands and Guam.

PPP opened its doors for business in January of 2007 and since then has grown to have 6 full time employees, a 1.5 acre yard on beachfront property, 68 pumps, generators and light towers available for immediate rental or purchase. PPP is the exclusive distributor for Godwin, TOYO, Cherne and Stancor equipment in Hawaii and has the ability to service and repair any pumps on Oahu with a trained mechanic and service truck. PPP continually seeks ways to improve its way of doing business and more opportunities to provide clients with the most efficient way of solving their fluid pumping or power generating needs.

Alysa Henry (shown in the above picture, second from the left) volunteered to leave Canada to spend the last 1.5 years in Hawaii to help get PPP rolling. In June, Alysa will be coming back to Canada to contribute her experience to CPP.
