

# The CPP Connection

The Monthly Newsletter of Canada Pump and Power

July 2010

**PUMP • BARGE • DREDGE**

## Who is Canada Pump and Power?

### Who We Are

CPP was founded in 2010 in Alberta. Our Management personnel have decades of experience in the Marine Industrial Industry. Our team of professionals includes engineers, tradesmen, supervisors, operators, and a certified safety professional.

### What We Do

With support from trusted manufacturers including CAT, Cornell, DMC, Ellicott and Lansas, the Production Group builds priming systems, dredging equipment, and portable barge units. Our Operations Group provides Marine Industrial Service to a select group of clients. We are committed to client satisfaction in these areas.

### How We Do Business

We follow a total quality approach. This means that we have a written procedure of checks and balances to ensure that:

1. We say what we are going to do.
2. We do what we said we would do.
3. We check to ensure that we did it.

### Everyone Home Safely Everyday

We believe the health, safety and security of our employees, contractors, subcontractors, clients, the surrounding communities and the well being of the environment are critical our success. We maintain a safety program committed to the prevention of occupational illness and injury. Our goal is zero accidents and injuries, maintaining a safe and healthy work environment.

### Some CPP People

More of our team will be featured in future newsletters as their pictures become available!

Jeremy – CEO

Jim – General Manager
