NEW HYDRAULIC TILLER DREDGE!!!

Hydraulic Tiller Dredge

August 27 was a landmark day for Canada Pump and Power. We completed production of the **first ever** Hydraulic Tiller Dredge! This dredge utilizes a CAT Tiller specially modified to dig underwater. Powered by a CAT Diesel Engine with a Cornell Hydraulic Submersible Pump, it pumps solids from underwater. We are seeing 50% solids by weight at 2,000 gpm.

Hydraulic Powerpack

This system is currently operating at Suncor in Fort McMurray and we are already producing a second unit. Please call for more information and availability!

Call us at your convenience at 1-877-898-3494 or email us at sales@albertapumps.com.
