PUMP • BARGE • DREDGE

Pump Production in Full Force

Canada Pump and Power (CPP) added eight new pumps to our rental fleet this February. These pumps consisted of six Dewatering Trash Pumps – two DT4's, two DT6's and two DT8's as well as two High Head Trash Pumps – an HT8 and an HT12.

Our rental fleet now has 32 pumps capable of a total flow of 1 10,000 gpm!

We are keeping busy with another 25 pumps in Production – we hope to have these completed and available to our fleet this spring.

In February we also finished production of our very own 12" Fluid Road Crossings which have already been put to work at Suncor in Fort McMurray. More information on the Fluid Road Crossings to come in our March newsletter!

Call us at your convenience at 1-877-898-3494 or email us at sales@albertapumps.com.
