February 2012

FIRST DIVE

Canada Pump and Power's First Dive was at Suncor's River Water Pump House in November 2011. Before the dive started, our Pump Division set up a bypass using two 18" DT18 Dewatering Trash Pumps so gate valves could be closed. This separated the flow of water from the Pump House and the River Water Pond. Once the gate valves were closed, divers safely entered the water and poured concrete to seal off some unused intakes 50 feet below surface.

Canada Pump and Power has trained, qualified, professional divers equipped with the latest underwater technology and equipment. We follow detailed Safe Work Procedures for every job, ensuring everyone gets home safely, every day.
