Mighty Pumps "Winches" Ahead

Mighty Pumps has an impressive fleet of equipment that does more than just provide pumping solutions for our clients. Pictured above is Mighty Pump's newest acquisition of tension equipment, the Lantec Model 750 Hydraulic Planetary Winch. It features a hydraulic gear motor, spring applied hydraulic-released multi-disc brake with overrunning clutch and three planetary gear reductions. This particular model provides an incredible 136,000 lbs. of pulling force! The Model 750 is also a power in/power out winch with equal speed in both directions. This allows our winches to be used in various applications because of this versatility.

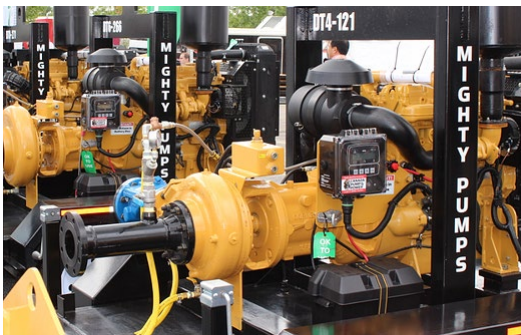

Mighty Pumps utilizes various sizes of these winches in complex applications. Pictured above is massive anchors used to stabilize a working barge platform at St. Mary's Reservoir in southeastern Alberta. Even though these anchors weigh one thousand, five hundred pounds each, our line of Lantec winches can handle them with no issue at all. No matter how big or small, Mighty Pumps has the equipment available to get the job done right. Our line of specialized industrial marine equipment is the best in the business. Call us at 780-922-1178 to speak to one of our experienced representatives to get you the right equipment for your application. We strive to be the best and easiest solution of Dive, Pump, Barge and Dredge needs for our existing and future clients.

Mighty Pumps is committed to being the best and easiest solution for all industrial marine services and products. Please give us a call at 1-780-922-1178 or email MP at sales@mightypumps.com for any industrial marine products or service solutions!
