Mighty Pumps Moves Slurry With New Line Of High Pressure Slurry Pumps

Mighty Pumps has an extensive fleet of pumps that does more than just provide clear water or sewage pumping. Pictured above is Mighty Pump's featured slurry pump, the HS8 Mighty Pump! It features a CAT C15 (600 HP) engine and 6819MPC

Cornell wet end. This particular pump can reach flows as high as 4325 GPM, and has an impressive shut-off head at 651 feet. This is quite the feat for any pump, let alone a slurry pump! With these pumping capabilities, the HS8 Mighty Pump is able to handle corrosive and abrasive material in complex applications.

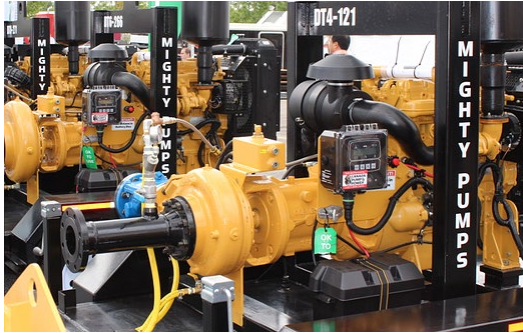

Pictured above is the HS8 Mighty Pump stationed at a mine. Canada Pump and Power used two of these HS8 Mighty Pumps in series to pump dredged material over a 150 meter dam! The HS8 Mighty Pumps can handle corrosive and abrasive slurry that ranges from 0-50% solids by weight, allowing the HS8 to pump various materials and level of solids with ease. No matter how big or small, Mighty Pumps has the equipment available to get the job done right. Our line of specialized industrial marine equipment is the best in the business. Call us at 780-922-1178 to speak to one of our experienced representatives to get you the right equipment for your application. We strive to be the best and easiest solution of Dive, Pump, Barge and Dredge needs for our existing and future clients.

Mighty Pumps is committed to being the best and easiest solution for all industrial marine services and products. Please give us a call at 1-780-922-1178 or email MP at sales@mightypumps.com for any industrial marine products or service solutions!
