## Algae Removal with a Mighty Pump

Algae was choking off this plant's ability to feed internal pumps with cooling water so they hired Canada Pump & Power to remove the algae from the top of the pond. We used a 4" Mighty Pumps DT4 to handle the stringy, deep mass of algae and discharge it to a location where they could dispose of it. We used a floating suction cage and two guys on each side of the pond to feed the algae into the suction line by dragging the cage through the algae and bringing it towards the pump. The end result was pumping more than 1600kg of algae and a very happy client!

If Canada Pump and Power can help you with any of your marine industrial or equipment servicing needs, call 1-780-922-1178 or email CPP at [Sales@CanadaPumpAndPower.com](mailto:Sales@CanadaPumpAndPower.com).
