## Canada Pump and Power Marine Services Come To The Rescue!

Canada Pump and Power Marine Services provided equipment and additional manpower during the Fort McMurray floods, assisting fire and rescue teams during

this state of emergency. Not only do we provide support for our Clients, we also support our communities when they need us the most. Our expertise in the industrial marine industry allows us to provide solutions to the most complex of challenges, including natural disasters. Canada Pump and Power's exceptional response time and professionalism was continuously sought after during these difficult times.

On April 26, 2020, massive flooding in Fort McMurray commenced due to the spring thaw of the Athabasca and Clearwater Rivers. As these rivers started to break apart, large ice chunks jammed instead of flowing downstream. This created a blockage approximately 25 kilometres long, causing the rivers to spill into the town of Fort McMurray. On April 27, 2020, a mandatory evacuation of the lower townsite region of Fort McMurray was triggered due to accelerated flooding. This forced roughly 13,000 people to leave their homes in the area.

Here at Canada Pump and Power, our deepest sympathies go out to all of the businesses and individuals that have been negatively affected by the major flooding across Fort McMurray.

**Canada Pump and Power is committed to being the best and easiest solution for all industrial marine services and products. Please give us a call at 1-780-922-1178 or email CPP at [sales@canadapumpandpower.com](mailto:sales@canadapumpandpower.com) for any industrial marine**
